

Gisele Sajanovich's VYB-X Testimonial

Written by Gisele Sajanovich, submitted 3/4/14 used with permission

A year and a half ago I had a really bad accident; I had my ankle almost completely disconnected from my foot. I had severe damages on my bone, joint, ligaments, tendon and nerves. I spent 1 month at the hospital and went thru 3 surgeries (including external rods)

and find out that I had very slim chances of walking again.

Even with this bad news I was determined to do

everything in my power to be able to walk again, and after a long recovery time with daily sessions of physical therapy and all kinds of strong medication I was on my feet again. I was happy with my progress but I knew that I would have many limitations and sequels, some of them are: severe precocious arthritis, pain caused from the pins on my ankle, bad blood circulation, compromised balance due to lack of ligaments, etc.

I couldn't walk long distances, on slopes, go up or downstairs, and my running days were over. At one point

I stagnated, I had showed no more improvements, the pain medication was no longer working like before and I had to learn to live with pain. That was a setback I didn't expect. Also, the side effects from all the medication I was taking started to become worse, stomach and liver problems, allergies and drowsiness were some of the symptoms. I was prepared to set my mind on how to learn to live with all of this, and I did that,

"I thanked him for the gift but to be honest I was 99% sure that this thing wasn't going to work, but I didn't want to be rude and put on the VYB-X wrist band."

bad as it was, pain and limitation were now part of my life. Until one day that a friend of mine gave me as a gift a VYB-X wrist band, and he explained to me all the benefits that it could bring me, and I thanked him for the gift but to be honest I was 99% sure that this thing wasn't going to work, but I didn't want to be rude and put on the VYB-X wrist band.

At first I felt nothing different; I was in pain as usual. But a couple of hours later the pain was a lot better, better enough for me not to notice my condition, and since that day I'm feeling a lot less pain, I'm taking about 60% less pain medication which is great. I know I still have a long way to improve my condition, but I believe that VYB-X is going to help me achieve my goals and who

knows maybe one day I can even start running again. VYB-X not only made my life better but also gave me hope of getting better every day.

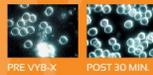

"But a couple of hours later the pain was a lot better, better enough for me not to notice my condition, and since that day I'm feeling a lot less pain,"

VITALITY MEETS TECHNOLOGY

LIVE BLOOD CELL ANALYSIS

Analysis of blood cells before and after applying VYB-X shows a vast improvement in the cell's shape, movement & density.

THERMAL IMAGING

Through thermal imaging, VYB-X has been shown to reduce stress and inflammation in most people in under 30 minutes.
